book 3 places for the
price of 2!

The Green Register - Pioneers in Sustainable Construction Training

About The Seminar

This NEW one day Green Register seminar is run by **Mark Saich**, whose extensive experience both as a **Building Control officer** and director of Green Building Solutions brings expert insight into the subject of **designing high performing, healthy houses** that will be future proofed against climate change. The emphasis throughout the seminar will be on **down-to-earth advice to use in practice**.

This seminar takes a critical exploration through **Part L, SAP and associated guidance** to look at what is required to achieve compliance with the building regulations and The Code for Sustainable Homes (ENE1 and 2), highlighting **solutions and pitfalls** through worked examples/**case studies**.

Throughout the day, Mark will emphasise the sustainable aspects of the Regulations and standards so that **delegates leave with a full understanding** of how to design and build **low energy, healthy, fully compliant homes fit for the 21st century**. Mark will also question whether the current tools and guidance can **truly deliver energy efficient and healthy homes**.

It's easy to become a member of The Green Register!

By attending two days of Green Register training (this course gets you half way there) you become eligible for membership. Join our ever growing number of building professionals benefiting from membership and boost your organisation's commitment to sustainable construction.

Enquire about membership today: call 0117 377 3490 or email mail@greenregister.org.uk.

About The Speaker

Mark Saich is a sustainability consultant and trainer. He regularly speaks at RICS, RIBA and Green Register events on a range of issues including Part L and sustainable construction. In 2006 was part of the team training building control professionals the then new part L on behalf of the DCLG.

Mark's background is in local authority and private sector building control and environmental health (private sector housing). Having gained BSc Hons in Environmental Science and Post Grad Diploma in Architecture (advanced environmental and energy studies) he set up and continues to run his own consultancy practice providing technical support on low energy projects.

What do the delegates say?

"Really good pace and well presented, kept our attention all day!"

"Exactly the right balance of technical content and clear presentation"

"Really excellent & seamless, expansive knowledge"
